Input to the IRU's Road Safety Campaign

NHO Transport is a full member of IRU. Unfortunately, we are prevented from attending the IRU Statutory meeting in Geneva on November 7th and 8th 2019.

We appreciate that IRU is planning to run a Road Safety Campaign, described in the letter with reference CTP/BR6780/JHU. Our proposal is to include collision safety for buses in this campaign. Buses should have the same collision protection as other vehicles. This includes improvement of collision protection at drivers' cabin and in the front of the bus.

NHO Transport therefore request IRU to work for changes of the international requirements ECE-66 and ECE-E107. [Please find the attached presentation telling why authorities should change the requirements for the collision safety of buses.](#)

Best regards
NHO Transport
